# Willow Valley Computer Club Newsletter

## Upcoming Computer Club Meeting Programs

Nov. 7 – Al Williams, “Social Media” (\*Manor North Auditorium)

Dec. 5 – Tony Poulos, “Time to Upgrade Your System”

**All programs are held at 2:00 p.m. on the first Thursday of the month in the Cultural Center Theater unless otherwise noted.**

## Quick Notes

- Ed Dahrsnin’s recycle team needs laptops, **printers** and USB keyboards
- See page 12 for *Renaissance* computer classes
- Some important information from prior newsletters is repeated in this newsletter

## The President’s Pen by Sid Paskowitz

**Membership** As of this writing, your Computer Club has 660 paid members including 488 who have signed up as Lifetime members. Please keep your email address on Club records current so we can send you important emails. **Those emails only go to Computer Club members for whom we have a good email address.** Send email address corrections or updates to Lee Wermuth at [lwermuth582@gmail.com](mailto:lwermuth582@gmail.com).

**Special Note for Windows 7 or Windows 8 Users** Willow Gables Resident Carolyn Henderson followed the guidance at <https://www.howtogeek.com/266072/you-can-still-get-windows-10-for-free-with-a-windows-7-8-or-8.1-key/> and successfully upgraded her computer from Windows 7 to Windows 10. She found it took a VERY long time. Her bookmarks were saved and her desktop looks like it did before the change. She did have to reset her new default browser from Edge to Firefox and she had some trouble running videos on Firefox. Videos worked using the Edge browser. Carolyn is willing to share her expertise with others who want to upgrade to Windows 10. Contact her at [johnh15d@aol.com](mailto:johnh15d@aol.com).

**Recycling** Ed Dahrsnin and his team are accepting working computers and components for recycling, but no CRT monitors. Let Ed know if you would like to help recycle computers. See page 8. Thanks to Ed and his team, the Computer Club has given more than **300** computer systems to local community support organizations. Working **computer printers are urgently needed.**

**Patience!!!** We continue to get phone calls and emails that report computers do not boot up quickly with a login screen or desktop when turned on. This is often due to Windows operating system updates that are installing. If you turn your computer off and turn it back on, the process just starts over again or introduces errors. If the drive activity light on your computer is flashing or lighted, your computer is working hard to get something done. **Be patient.** You may need to give your computer a couple of hours to catch its breath. If you still have a problem, see the next paragraph.

*Continued on page 2)*

(Continued from page 1)

## President's Pen (Continued)

**Help with PCs** Cathy Thorn and Bob McRobbie (for Manor Residents) have volunteered to help with PC problems. Bob's and Cathy's phone numbers are at the top of the home page in Information Central. Also, please let Cathy know if you think you can help others with computer problems so she could contact you instead of her needing to go to the far reaches of Willow Valley to help others. Help with Apple computers is also listed at the top of the home page in Information Central.

### **Mozilla Disclosed a Serious Firefox Security Exploit. Update Your Browser Now.**

The Computer Club suggests Firefox as a preferred browser. Firefox is a safer browser meaning that it is more hack proof (not absolutely hack proof, just more hack proof than most). Chrome no longer blocks ad trackers of any type. This means that all of your browsing is tracked and that your privacy is not respected.

**Please Use Recommended Software** PC owners are reminded that they will receive the best help if they use software that is familiar to other Resident volunteers who provide technical assistance. Recommended applications are CCleaner, Malwarebytes, Defraggler and Windows Defender (or Windows Security Essentials). We recognize there are alternatives; however, problems are more quickly diagnosed and repaired when the applications running on the PC are familiar to the helper.

**Training Coordinator** Chuck Smith is our Computer Club Training Committee chairperson. Please let Chuck know if you have suggestions for computer classes so they can be included in *Renaissance* publications. Also let him know if you could teach a class. Contact Chuck via email at [csmithii@aol.com](mailto:csmithii@aol.com).

I continue to get phone calls and emails from Residents whose computer screens tell them they have been hacked! If that happens, use the power button to turn off your computer by pressing it until the power light turns off. Wait a few minutes and turn your computer back on. Chances are good that the warning will not reappear.

If you get an unexpected pop-up on your computer telling you an update is available and if you should click on the pop-up, there is a chance that pop-up is bogus and clicking on it will result in malware being put on your computer. A general recommendation is to go to the application itself and update from the application.

**Fake Emails** A day doesn't go by without someone at Willow Valley getting an email from someone they don't usually get emails from. They are almost always scams or contain malicious software. **Don't open them. Don't click on their links. Don't call the phone numbers they display.** I continue to receive emails from someone who had passed away several years ago. *That makes me suspicious.* If you think the email might be real, call the sender on the phone using a phone number you know is valid.

Stop using Internet Explorer or Chrome. Use the Club's preferred Firefox.

## Computer Club Leadership

### Officers

President: Sid Paskowitz

Vice President: Peter Scott

Secretary: Gary Staton

Treasurer: Lee Wermuth

### Committee Chairpersons

Program: Peter Scott

Training: Chuck Smith

Equipment: Ed Dahrsnin

Technical Support: Tony Poulos

Website: Sid Paskowitz

Publicity: Wally Gordon

Newsletter: Sid Paskowitz

Apple Interest Group: Steve Lynn

North Computer Lab Coordinator:  
Lee Wermuth

### Community Representatives

Manor North: Charlie Trumbo

Lakes Manor: Bruce Mawson

Providence Park: Peter Scott

Willow Gables: Cathy Thorn

Garden Apartments: Al Williams

## The Mission

The Mission of the Willow Valley Computer Club is to:

- Provide the means to educate beginners or interested non-users on how to use a computer.
- Arrange for speakers to talk to the Club about subjects that would be of interest to those with some background and experience in computer use.
- Provide a forum for interchange of computer information among members.

For more information about the Computer Club, please contact Sid Paskowitz at 717-464-2127 or via email at

[wvcomputerclub@gmail.com](mailto:wvcomputerclub@gmail.com)

Avast, McAfee, Kaspersky and Norton security software (and possibly others) have been known to block security features and updates to Microsoft security programs (Firewall, Defender and Security Essentials). Some have also been known to slow computers to the point of not being useful, and not just during updates. For those reasons we do not recommend the installation of Avast, McAfee, Kaspersky and Norton security software for PCs.

**Backup files** Please remember to periodically back up your important files to a flash drive, cloud or external hard drive. You never know when a computer might have a problem, and being able to put those saved files on a replacement computer can save a lot of time, money and headaches. Do not back up your files after your computer has been compromised. That can cause your backup drive to be compromised as well. Get professional help if your computer has been compromised. Tony Poulos uses Backblaze for his backup service.

Windows Defender will now be called Microsoft Defender, while Windows Defender Exploit Guard is now called Microsoft Defender Exploit Guard.

## Reviewer Acknowledgment

The following individuals kindly reviewed this issue:

Wally Gordon Al Williams Tony Poulos Chuck Smith Cathy Thorn Jay Shah Ed Dahrsnin

Thank you,  
Sid Paskowitz

## Actions

**Classes** We know we need more classes on computer-related topics and we are looking for instructors who can teach those classes. If you can help other Residents with topics such as Word, WordPad, Notepad, browsers, email, etc., please send Chuck Smith an email at [csmithii@aol.com](mailto:csmithii@aol.com).

---

**CCleaner Issues** Some updates to CCleaner include **checked** boxes that allow the CCleaner update to install *Avast* or the CCleaner browser. Uncheck the boxes. We have found the *Avast* software to be a memory hog and a program that interferes with protections that Windows provides. Use CCleaner -Tools to uninstall Avast if Avast has been installed. We don't have any experience or knowledge about Ccleaner browser and, at this time, recommend not installing it.

---

**Windows Updates** Although Microsoft had announced they were no longer providing updates to Windows 7 and Windows 8 operating systems, they recently found some computer chips and operating system computer code are susceptible to exploits and malicious software. Because of those findings, Microsoft has been sending software "patches" to older computers as well as newer Windows computers. Those software updates are generally being distributed on Tuesdays. Be aware these changes can be occurring even if you did not request an update, so if your computer seems to be unusually sluggish on a Tuesday or later startup, the issue may be a Windows update running in the background. **Be patient!!!!!!!!!!!!!!!!!!!!**

---

**Get Your Own Answers** We are often asked questions that can be quickly answered without needing to ask another person. If you know the key words in posing questions to another person, you probably know enough to use those words in a Google search where you could get the answer as a text display you can select and print, or a YouTube video you can watch. For example, to find how to do a channel scan on a Vizio TV, enter **Vizio TV channel scan** in the Google search box and choose the display that is most reasonable to you. If you are **not** comfortable with selecting a link on your computer, use a Resident Computer Kiosk to do your search. Be sure to restart the Kiosk unit when you finish in case a site you visited contained malicious software (malware). Restarting a Kiosk computer removes the history of what you did as well as any malware that may be on the Kiosk computer.

---

Sometimes, if you get a popup you can't clear, it is best to turn off your computer by pressing the power button until the power light goes off (this may take ten or fifteen seconds), even though the popup says not to turn off your computer. Next unplug your computer from its power source for about a minute. If you have a laptop computer, remove the battery for a minute before reinstalling it. Let Cathy Thorn know if you continue to have the popup problem.

## Warnings

**Scams...** **No one** who calls you, emails you or displays a message on your computer or device can tell you your computer or device is infected or running poorly. They have to have been given access. If you haven't given them access, you are being scammed. Don't give them access. Hang up. Disconnect. Shut down. Do not respond to emails that say your account is missing information or that say they were not able to deliver a package with something you did not order. Be skeptical. **Protect yourself.**

**Beware of using Google or another search engine to locate the phone number of a product manufacturer to get help with their product.** Check the equipment manual to find their help line number. It is too easy for a bogus website to be made to look like a legitimate company site and the address of that website to be very similar to the legitimate company's name. Be especially suspicious when the address of the website as shown in the status display or text bubble ends in ".UR" or ".RU" or something other than .COM, .org or .info which legitimate companies are more likely to have.

Some new, but not surprising, information about malicious software: Google continues to find Android spyware in its app (application) store. **That spyware has been there for years without being noticed.** Millions are potentially affected. This brings up an interesting point I would like to emphasize. The Computer Club tries to be selective in the PC software we recommend, and those recommendations change over the years when we find software we like better. For example, a number of years ago we recommended Zone Alarm as the preferred firewall and AVG as the preferred anti-virus software. Today we recommend the Windows firewall and Windows Defender or Windows Security Essentials, and Malwarebytes as the anti-virus software. Other programs perform similar functions but we have experienced good results with the programs we recommend. We suggest caution in loading programs that may pop up on your computer screen or might be listed when you do an Internet search for software that might address a problem you are having. The experience with the Google store demonstrates that being skeptical can have its virtues.

---

**Even Linux can be infected with malware.** *Linux.MulDrop.14* is a malware program that can infect Linux devices. No operating system is immune from malware.

---

## Technical

**RAM on new PCs** Our experience when helping others with their older PCs indicates slow PCs are caused by insufficient RAM (Random Access Memory) that may have met minimum requirements when the PC was bought, but software updates and newer software running in the background use more RAM than is available. Based on that experience we recommend new PCs have at least 12 GB of RAM for future needs. PCs can also run slow based on insufficient Graphics Processing Unit (GPU) performance.

**Windows 10** Ed Dahrsnin and his computer recycling team have an inventory of Windows 10 PCs that are available FREE TO COMPUTER CLUB MEMBERS. We encourage all PC users to use Windows 10.

**Windows Updates** Some computers can act strange when they are turned on. One thing that may be causing the change is that Microsoft has been sending out updates to Windows, even for Windows versions that Microsoft has reported they are no longer supporting. The updates being sent out contain patches to security vulnerabilities that have existed for years and are being exploited by current malware.

One problem being reported is the computer, or screen, or mouse, or keyboard is not being responsive. Those conditions are not unusual during a Windows system update, some of which can take up to a couple of hours. The solution in many cases can be **patience**. If a computer is turned off during an update, problems can be created. Let your computer finish its update. Look for the light that shows activity on the hard drive. If it periodically flashes or stays lighted, your computer is probably working on installing an update. Let it finish and display a screen you recognize. If the computer continues to run overnight without restarting, press the power button until the computer turns off. Wait a couple of minutes and turn the computer back on.

If you still have concerns when your computer comes back under your control, run Malwarebytes and the full scan (after updates) using Windows Defender or Security Essentials to check for malware that may be on your computer.

The best way to deal with malware is to **Keep Devices Current**. Almost all modern electronic devices that are susceptible to malware (malicious software) provide facilities to update their software (applications) and firmware (code that tells hardware what to do). There are too many devices and versions to provide a single set of instructions for keeping devices current. The best each of us can do is to learn how to keep our own devices current. Use Google or other search engines to get information on keeping devices current, or come to Computer Club meetings and classes and ask for help.

## Technical (Continued)

**Printer Problems with Windows 10 Updates** Several Residents have reported printer problems after a Windows 10 update. One solution has been to connect and turn on the desired printer, go to *Printers and Scanners* in System Settings, add the desired printer if it doesn't show up in the list, select the desired printer as the default printer, then check to see if the problem has gone away.

---

**Drivers for 32-bit components** Recent articles in the technical media have reported more companies are no longer updating drivers (software that tell components how to function) for 32-bit operating systems. Newer computers have 64-bit operating systems. If you want to check on what operating system is on your computer, an easy way is to open CCleaner and look at the top-left corner of the screen.

---

**Spring Run Business Center** The Spring Run Business Center on the 5th Floor of the Spring Run core building has a Windows 10 computer that is capable of reading SD cards and 3.5" floppy drives. The computer also has an attached flatbed scanner that can scan documents and pictures, as well as convert scanned text in a document to a digital text file (an Optical Character Reader—OCR). If you bring your own flash drive, you can copy any of those files onto your flash drive and take them home for later use. Many of us have a stack of 3.5" floppies we can't read. Here is a solution.

---

If you have a working laptop computer or printer you could donate, please give it to our computer recycling team on Mondays as described on the next page.

---

We recommend having at least 2 browsers on your Taskbar. Some web pages, such as WV Service Requests, may not work with Firefox but do work with other browsers. Firefox is probably the most secure browser. Be prepared to try a different browser if you get an error message on a web page.

---

Microsoft says machines running Windows 10 April 2018 will stop receiving security updates in mid-November. This is a preemptive move by Microsoft to ensure that Windows users are running the most up-to-date and secure version of Windows 10.

---

**Restore Point** Al Williams has written a beneficial article on how to remove software that you tried and no longer want on your computer. You have to set up your computer before hand. His easy-to-follow instructions can be found by left-clicking on the link to **Restore Point** in the left column in Information Central, the Computer Club tile on the Resident Computer Intranet home page.

---

Gary Staton has recommended the use of *Patch My PC* (patchmypc.com). Al Williams reported: "I went to Options and selected Create Restore Point Pre-update, Disable Silent Install of Apps, and Enable Verbose Logging. The title of outdated apps is shown in red; installed apps that are up to date are shown in green."

**PC Hardware Recycling report of 16 October 2019 – Ed Dahrsnin**

758 Systems have been worked upon to this date.

302 Computers have been given to Outside Groups, as of 27 September 2019

**Systems available (FREE) for Club Members:**

**Note: Tower systems include a tower, monitor, keyboard, mouse and all cabling.**

**Laptops include a power adapter with unit, no printer or mouse.**

System 742 (HP Envy dv6-2CE2362HP6) Laptop available 01 September 2019

System 752 (HP EliteBook 8570p-5CB250200R) Laptop available 14 September 2019

System 753 (HP ProBook 4530s-CNU2120CZ9) Tower available 14 September 2019

System 752 (HP EliteBook 8570p-5CB250200R) Laptop available 14 September 2019

System 753 (HP ProBook 4530s-CNU212CZ9) Laptop available 14 September 2019

System 756 (HP Pavilion dv7-CNF0418HPM) Laptop available 25 September 2019

System 757 (Dell Latitude e6400-4CVD4L1) Laptop available 06 October 2019

System 758 (HP ProBook 450 G2-CND5442XKK) Laptop available 12 October 2019

**All laptops have a minimum of approximately 4 GB of RAM. If a club member wants additional RAM, they must pay for the added RAM. The Recycle group will procure the RAM and install it.**

**Systems passed on:**

System 743 (HP Compaq 6200 Pro) Tower This unit to Tabor Community Services on 25 September 2019

System 744 (HP Compaq 6200 Pro) Tower This unit to Tabor Community Services on 25 September 2019

System 745 (HP ProDesk 400 G1) Tower This unit to Tabor Community Services on 25 September 2019

System 746 (HP ProDesk G1) Tower This unit to Tabor Community Services on 25 September 2019

System 747 (HP pro 3000 Micro tower) Tower This unit to Tabor Community Services on 25 September 2019

System 748 (HP Pro 3000 Micro tower) Tower This unit to Tabor Community Services on 25 September 2019

System 749 (Dell Studio XPS8100) Tower This unit to Tabor Community Services on 25 September 2019

System 750 (Toshiba Satellite L875D) Laptop This unit to Tabor Community Services on 25 September 2019

System 751 (HP Pro 3500) Tower This unit to Tabor Community Services on 25 September 2019

System 754 (HP Pavilion dv6) Laptop to Gregory Gibson as a raffle prize on 03 October 2019

**Items scrapped:**

Toshiba Satellite L655 laptop on 07 October 2019

A Dell Inspiron Mini 10 Model PP19S laptop, on 07 October 2019

A MAC OS x 10.6.8 Unit on 07 October 2019

A Dell Dimension 4700 tower on 14 October 2019

A Dell Inspiron 530-DCMF tower on 14 October 2019

An HP Compaq dc5700 SFF tower on 14 October 2019

**Wanted:**

**USB Keyboards, Laptops, with power adapters. We are seeking those no longer-used units that you may have in your storage cage or elsewhere.**

**Supermarket paper bags, with handles – like those from Darrenkamp's.**

**We continue to accept printer cartridges and laptop computers with power adapters, also working printers with cartridges.**

**Bring the items to Manor North's Recycle Computer room on the fifth floor of Manor North 'J' building on Mondays only, after 1 p.m.**

**Bill Scarpero has added his services to the Computer Recycling efforts in preparing mini-towers for additional add-ons.**

**With the work of Bruce Thompson in the Computer Recycle Room, we now accept Apple products for recycling.**

**The systems listed above, plus many computer power cords, Webcams, coax TV cables, telephone and audio cables are available in various lengths. Check us for your needs – we may have it, and it is free to club members. Visit us at Manor North's Recycle Computer room on the fifth floor of Manor North 'J' building on Mondays only, after 1 p.m. and pick it up.**

**We no longer accept stand-alone scanners or monitors of the Cathode Ray Tube type. (Take them to the Solid Waste Management Recycling center on Harrisburg Pike).**

## Apple Information

**Apple SIG Meetings** Apple Special Interest Group (SIG) meetings are at 2:00 p.m. on the 4th Tuesday of the month in the Manor Orr Auditorium. Check the *Weekly Insider* for further information. In addition to a main topic, each session will also include News & Views, Appalooza (the app for the month) and Tips & Tricks. **Meetings resumed in October.**

---

**Apple Store** For purchases, learning or help, the Apple Store is located at 541 Park City Center, Lancaster, PA 17601. Their phone number is (717) 295-8800. Or Google "Apple Retail Store, Lancaster PA" or go to [www.apple.com/retail/parkcity](http://www.apple.com/retail/parkcity). The local site comes up with address, phone number, hours of operation. There are links to schedule either the "genius bar" (their support/ service team) or "workshops" (in house training sessions). While no ID is needed for the workshops, the site will query you for your Apple ID to register for the genius bar.

---

### Apple Help

- For help at Manor campus, call Steve Lynn at 610-547-4615.
  - For help at Lakes campus, email Ed Neff at [neff.ews@gmail.com](mailto:neff.ews@gmail.com).
  - Another recommended place for help with either MACs or PCs is TCW-GAV located at 254 South Esbenshade Road, Manheim, PA 17545. Website: [www.tcw-gav.com](http://www.tcw-gav.com) then select Home Services & Products and then Support & Repair.
  - Apple online help is at [getsupport.apple.com](http://getsupport.apple.com) where you can select specific devices and issues and then it will suggest several options for the solution.
  - AppleCare warranty service, call 1-800-692-7753
  - Telephone assistance for iMac, iPod or iPad, call 1-800-275-2273
  - Telephone assistance for iPhones, call 1-800-694-7466
  - Lastly, a person can Google the problem they are having and a list of suggested sites will be listed as possibilities for the answer.
- 

### Apple Newsletters

The Apple SIG group sends out its own newsletter which concentrates on Apple iOS and Mac devices and now has an email list of over 250 people. If you would like to add your name to the email list, notify me, Steve, with an email to [slynn15@icloud.com](mailto:slynn15@icloud.com) giving me your name and email address and any other information as you desire.

---

### Apple Information from Steve Lynn

*The following is an article from USA TODAY by Jefferson Graham dated August 18, 2019 at 7:48 p.m. ET*

If it's mid-August, it's time to start the hype about new iPhones.

Apple traditionally announces new editions in early September at a media event on its Cupertino campus and releases the phones by the last week of the month.

Here's what we know (or think we know) so far:

•**DATE:** The media event is expected to be scheduled for Sept. 10. According to [iHelp BR](#), a Brazilian website, a screenshot in the latest edition of the iOS 13 beta software shipped to developers has a screenshot of the preview screen showing the 10th as the date. This could be wrong, but Apple has historically announced the new phones in the second week of September. We predict the phones will go on sale Sept. 20th.

## Apple Information (Continued)

Screen shot from new iOS 13 software (Photo: iHELP BR)

- **NAME:** The iPhone 11, iPhone 11 Pro and iPhone Pro Max are the names analysts peg as the replacements for the XR, XS and XS Max. Say them aloud a few times and see how easier 11 and 11 Pro roll off the tongue than XS and XS Max. (Of course, the proper pronunciation is 10 S and 10 S Max, but many fall for the X's instead.)
- **SPECS:** More power, a slightly bigger screen and three cameras, instead of two, on the Pro versions, per [The Verge](#). Similar to editions of Samsung's Galaxy S10 and the upcoming Note 10, analysts see an addition of an ultra-wide-angle lens, to get more people into your selfie shot, on top of the existing wide-angle and medium portrait lens. The Pro Max is expected to have a larger, 6.1-inch screen, topping the 5.8-inch XS.
- **PRICING:** Analysts expect Apple to have the same pricing as the current models, \$749, \$999 and \$1,099.
- **AVAILABILITY:** Unlike the previous two years, which saw releases in September and November, analyst Daniel Ives of Wedbush Securities believes they will all be available in September this year.
- **WHAT ABOUT 5G?** This year is about incremental improvements, while the bigger re-design is expected in 2020, with the release of an iPhone that works with the new 5G networks, [per 9to5 Mac](#). Apple will be a year late to the party. Samsung currently has a 5G edition of the Galaxy S10 available now, and a new Note 10 that works with 5G will be released on Aug. 23.
- **WHAT ELSE WILL APPLE ANNOUNCE AT MEDIA EVENT?** A new updated Apple Watch is expected, along with pricing and a start date of the new Apple TV+ subscription service. Apple has said in the past only that the streaming service would debut in "the fall." The service is Apple's attempt to take on Netflix with original series and movies, featuring Jennifer Aniston, Reese Witherspoon, Steve Carrell and others.

The iPhone is the best-selling consumer device in the United States but has hit a rough patch, as consumers have fought back against paying higher prices for the phones. Apple also has to navigate its way through a new trade war being waged by the United States government with China, and new tariffs that are being placed on Apple products. A tariff on iPhones and computers was expected to kick in next month but got delayed until December.

---

Any comments on the above information shown in the Apple section would be appreciated by myself. Also, you are welcome at any time to make suggestions for other topics that you would like to see in upcoming issues. Send responses to me at [slynn15@icloud.com](mailto:slynn15@icloud.com).

## President's Pen (Continued)

### TiVo Update

TiVo has discontinued the Bolt models. They have been replaced with two new models – The TiVo Edge for Cable and the TiVo Edge for Antenna. Both can be voice controlled.

According to a preliminary assessment, the TiVo Edge for Cable model will work with Campus TV. The Edge has more capability to record programs. It will record up to six programs at the same time because it has six tuners. It can store more recordings, up to 300 hours of HD material, because it has a 2 TB hard drive. It also has more features and services as detailed in the TiVo literature.

It's more expensive than previous models. The Edge for Cable box is \$400. In addition, a service plan is needed –\$15/month, \$150 annually, or \$550 for the All-In (lifetime) plan.

---

**Beware!!** *HotHardware.com* has reported: “Amazon Shreds User Privacy By Sharing Personal Alexa Voice And Data Recordings” which should serve as a warning that anything we say or do that involves the Cloud is susceptible to capture and sharing. When you are not using Alexa or Google Assistant, TURN THEM OFF by removing the power! Protect yourself. While using them, be careful what you say.

---

### Microsoft News

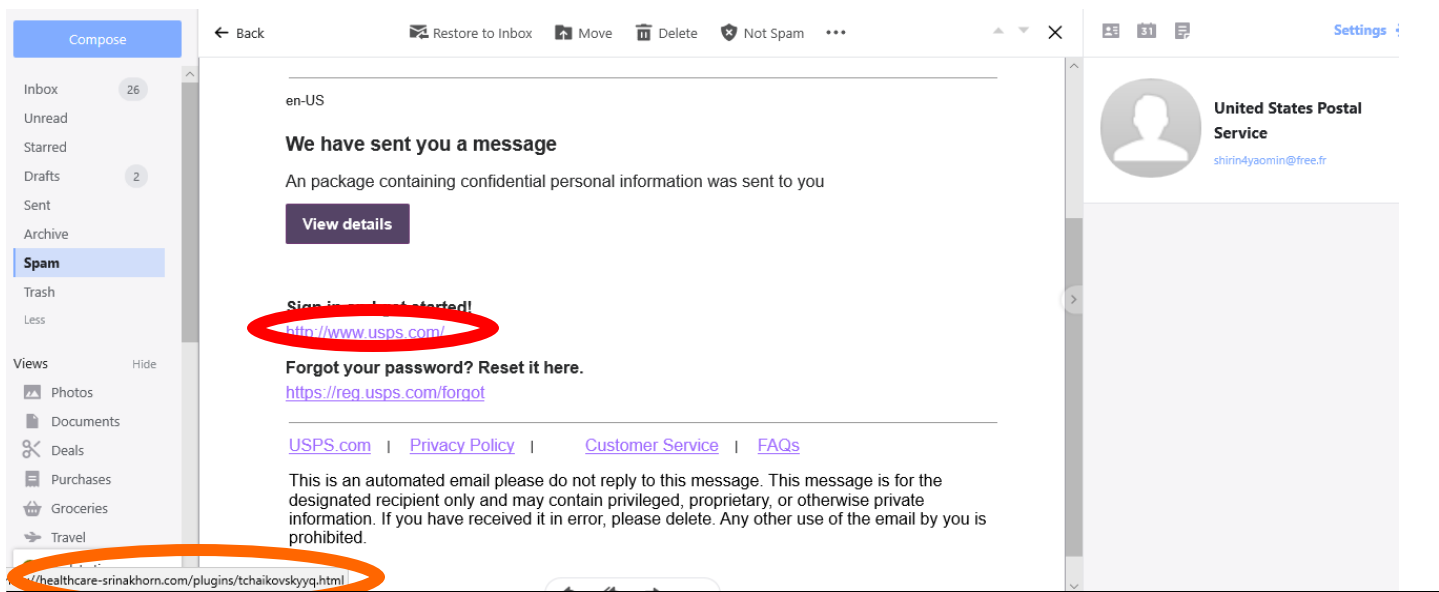

**Windows 7 extended support will end on January 14, 2020. Office 2010 support will end on October 13, 2020.**

Microsoft announced the end date for Windows 10 Mobile support as it focuses on Android and iOS. The final end date for Windows 10 Mobile support: December 10<sup>th</sup>, 2019. The last major release of Windows 10 Mobile occurred in October 2017, and Microsoft has only provided security updates since that time. Microsoft *recommends that customers move to a supported Android or iOS device*. Microsoft is winding down its Windows 10 Mobile operations and beefing up its apps and services for Android and iOS. Microsoft apps/services like Bing, Cortana, OneDrive, Office 365, Xbox, Edge are readily available for Android and iOS.

Microsoft has made no bones about embracing subscription services for their products. Office 365 has largely phased out its perpetual licensed counterpart - e.g. Office 2019 - by enticing users with a low up-front cost, continual updates, and additional perks utilizing Microsoft's cloud services.

If you find you have problems with certain web pages, try accessing the page with a different browser (e.g., Edge, Firefox, Chrome, Safari). You might consider having more than one browser on your taskbar to facilitate the change. Also, if you have a problem reading a file such as the PDF file used for this newsletter, try reading the file with a different PDF reader. Default applications for accessing different file types can be set by typing **Choose a default app for each type of file** in the search box at the bottom left of the screen and then scrolling down to the name of the file extension (e.g., .PDF) to see your choices to read that type of file. We have found **Adobe Reader DC** works well with reading our newsletters. If you don't have Adobe Reader DC, you can download it at no cost at <https://get.adobe.com/reader> .

**Email Scam Example** Below is an image of a scam Amazon Order Status Email that indicates it was sent by the US Postal Service. A quick way to show it is a scam was to put the cursor over the link in the red oval below. The address that then displays in the status bar in the orange oval below shows the true link is bogus and not to usps.com.

## RENAISSANCE COMPUTER CLASSES

The following computer classes are or will be listed in the *Renaissance* publication. They are provided so you can decide what classes you want to attend before needing to wait until the *Renaissance* publication is distributed, can be ready to sign up when sign-up is available, and can avoid scheduling activities such as doctors' appointments when you want to attend a class and you have some flexibility in setting up your appointments. **As always**, schedules are subject to change and the information below is our best information at the time of the publication of this newsletter.

There is no charge for any of these classes. **Register using Event Registration. Classes are in the Cultural Center Education Room unless otherwise noted.**

### Apple Basics & Intermediate

This course is for those Apple users that want to learn more about Apple's key programs Pages, Numbers and Keynote. These programs are included free-of-charge with every Apple desktop and laptop and can be downloaded free-of-charge into iPhones and iPads from the App Store. The programs are very effective in creating great looking documents, spreadsheets and slide show presentations. In addition to basic concepts, some intermediate techniques will be explored to make these programs even more worthwhile and appeal to those that are somewhat beyond the basics. Those that feel they are not technically oriented need not worry as there will be plenty of time during and after presentation to have your questions answered.

#### Thursday, October 31st

10:00 am – 11:30am

Cultural Center Education Room

Presenter: Steve Lynn, Manor Resident

Cost: no charge

Registration is required using Event Registration

## Renaissance Computer Classes (Continued)
